# THE FREEWAY SA160

## - THE ULTIMATE STANDAID

With **Freecote** Anti-Microbial coating effective against MRSA and other hospital acquired infections

The **Freeway SA160** is the result of excellence from every source: Designed from the experience of healthcare professionals and extensive trials, the compact SA160 standaid is easy to use, comfortable and with standard unique features above any other in its class. The SA160 is the only standaid designed for use with Chest Sling, Chest and Posterior sling and Dual purpose sling, and provides a safe dignified lift for a wide range of people.

### Features

The SA160 provides maximum function and comfort in a standaid:

- Two sling attachment points provide two different lifting actions: conventional lifting, or a natural 'head over heels' procedure.
- Using a Freeway dual access sling, and the two attachment points, a natural sitting position can be achieved
- Different width options for the posterior sling attachment straps
- Multi-directional kneepad allows easy individual adjustment and provides full support during the lift
- Ergonomically designed push handles are at comfortable height and width for the carer
- Removable footplate has choice of horizontal or angled position

### Technical

- 160 kgs (25 stones ) maximum user weight
- Electric leg opening with wide base for access and stability when fully open
- Actulog cycle counter
- Handset displays available battery life

Control box :

- Emergency Stop Button
- Lift & lower buttons (which can be also be used without handset)
- Battery life indicator
- On board charging or optional desk top charger
- Low friction castors for easy manoeuvrability
- Separates easily into two pieces for transport
